Service Overview

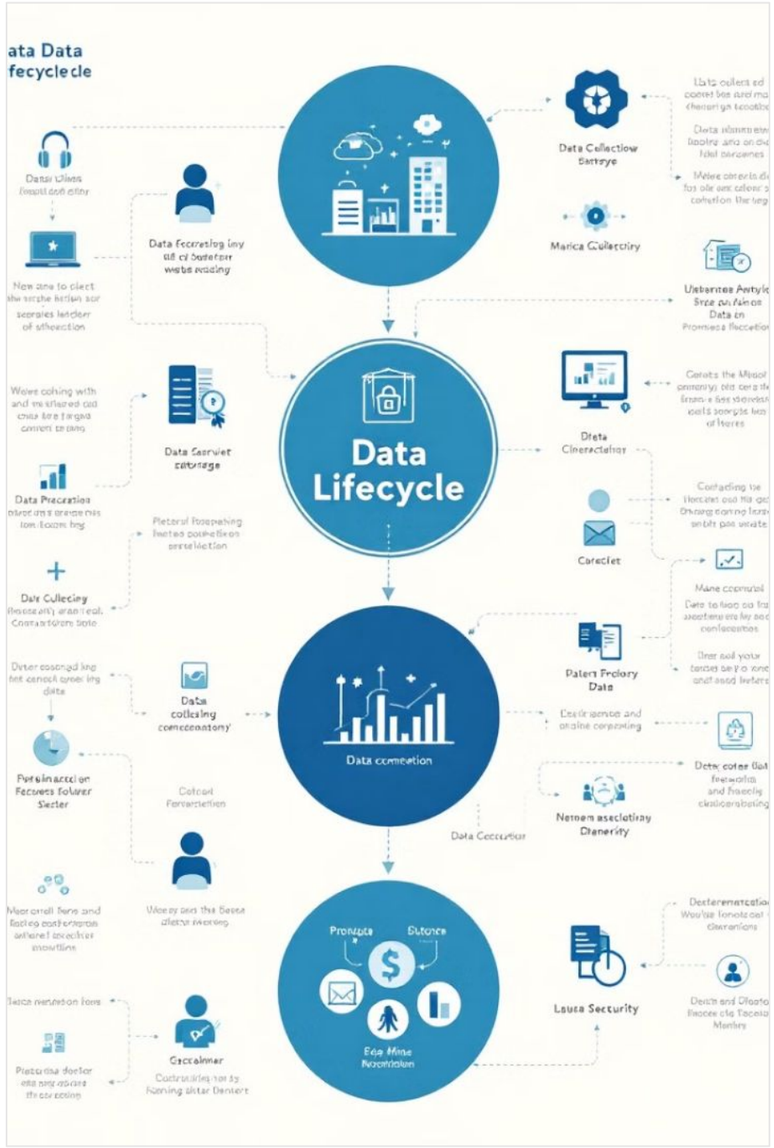

Business Goals	AI Ecosystem Assessment	Create Strategic Roadmap
We start by understanding your strategic goals. We recommend high-impact AI use cases aligned with your business objectives.	Next, we assess your current data and AI maturity. Our experts identify gaps and enablers for successful AI adoption journey.	We develop an action plan for sustainable technically sound AI integration and innovation.

The **outcome** is a robust **AI readiness framework** that is business-driven and innovation-ready.

Considerations Include

- ❏ Business-First AI Design
- ❏ Integrated Technology Readiness
- ❏ Innovation Foresight

Delivery Process

1

Alignment and Discovery

We collaborate with client business team and AI use case sponsor to discover and unify goals. Goals are shared in writing.

2

AI Ecosystem Maturity Assessment

We evaluate client data and technology landscape against [RDI proprietary AI Reference Architecture model] and deliver a comprehensive value assessment report.

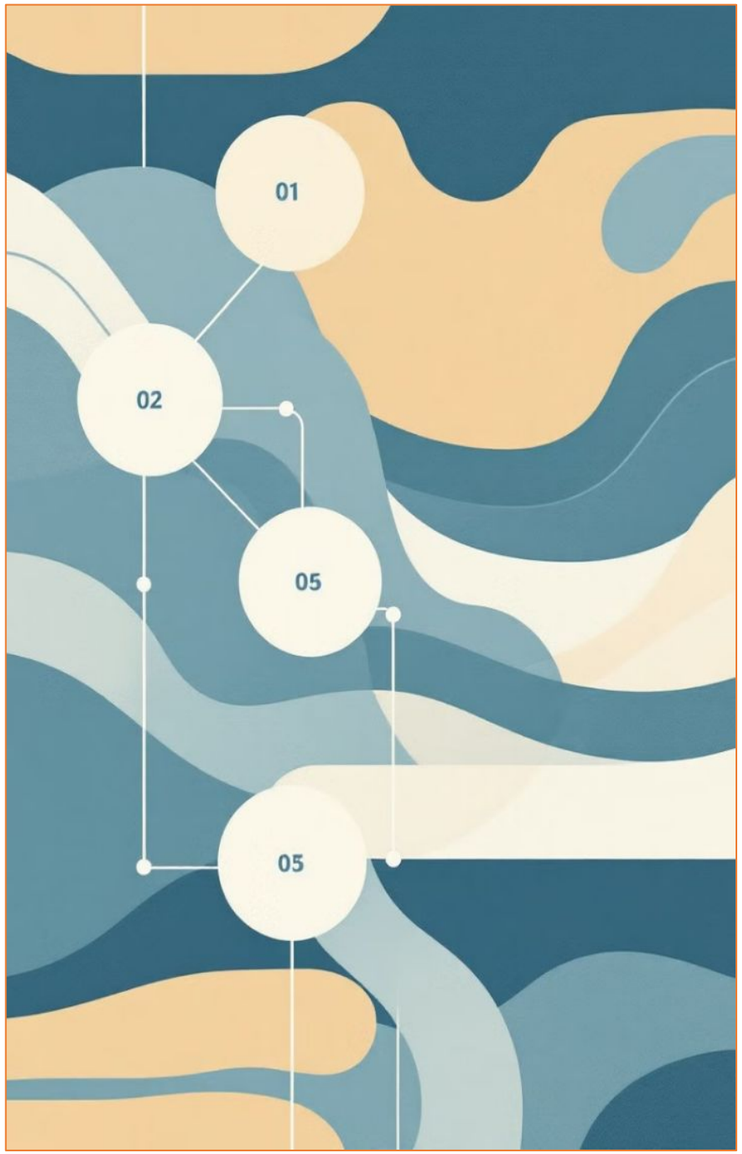

3

AI Readiness Framework

We produce a draft AI readiness framework, review with stakeholders, and incorporate their feedback. The final document guides your AI strategy, implementation priorities, and ongoing governance.

Key assumptions include client sharing materials, access to critical resources, staff and documents and timely advice of any material changes

Annual Refresh

First

Year 1

AI Readiness Plan to establish the framework. Two quarterly checks to monitor plan adherence. End of year plan revision to incorporate upcoming AI program enhancements.

After

After

Three Quarterly checks to monitor plan adherence.
End of year plan revision to incorporate upcoming AI program enhancements.

Checks are scheduled in advance with one week execution time

The annual plan revision is also scheduled ahead of time and typical takes between 1 and 3 weeks to complete
